

GENERAC®

Standby Generators

FOR HOME AND SMALL BUSINESS

Our lives depend on power.

Power outages can happen at any time, without warning, and can leave you powerless for days. Without power, you will not have access to, or have the ability to use:

- Refrigeration for food and medicines
- Cell phone and cell phone charging capabilities
- Heating and cooling systems
- Lighting
- Appliances
- Television and radio
- Water heater
- Computer and internet
- Garage door opener
- Well/water pump
- Washer and dryer
- Sump pumps
- Security system
- Septic pump

Generac is the #1 name in standby power

At Generac, we protect the things that power your life by providing quality, affordable power solutions. Since 1959, we've focused primarily on power generation, and we now offer more generator solutions than any other manufacturer. That heritage has helped make us the number one choice in residential standby power. When you choose Generac, you're choosing to have peace of mind and the power to live.

8 out of 10 homeowners choose Generac

for their home standby generator

How a home standby generator works:

1 Your power goes out.

Maybe it's a storm. Maybe the electrical grid failed. Maybe one of those cyberterrorists attacked the grid system. Whatever the cause, the power is out and you need a solution.

2 Your generator detects the outage and automatically turns on.

Within seconds, your Generac transfer switch senses the problem, and tells your Generac generator to turn on. Your generator turns on and your house is fully powered – whether home or away – and it keeps the power on, whether the outage lasts hours or weeks.

3 Your generator automatically turns off.

When your Generac transfer switch senses that utility power is restored, it tells your Generac generator to turn off and switches your home's power source back to utility power. Your generator returns to standby mode, waiting to answer the call the next time you lose power.

Choose the right size home standby generator for your situation.

By sizing your generator according to your needs instead of your home's square footage, you won't overspend or be surprised by inadequate coverage. Generac has the solution; **essential circuit coverage** for the basics, **managed whole-house** for average coverage, and **complete whole house** coverage to protect it all.

LEVEL 1

ESSENTIAL CIRCUIT COVERAGE

Many homeowners choose to cover only their essential circuits during a power outage. Choose from options that create a simple, economical solution that keeps essential appliances operating during a utility power outage.

LEVEL 2

MANAGED WHOLE HOUSE

Get whole-house coverage through smart power management. If it is unlikely you will turn on every appliance at the same time (most people don't), a smaller generator paired with a Generac power-management switch provides whole-house coverage through a managed power solution by managing the power requirements of individual appliances.

LEVEL 3

COMPLETE WHOLE HOUSE

Generac's full line of backup power generators include larger generators capable of covering every circuit in any size home for complete whole-house protection. Never wait for an appliance to take its turn being powered. When the power goes out, everything goes on and stays on — no matter how many circuits need to be backed up.

Home Standby Generators*

Never worry about losing power again with a home standby generator.

You can't put a price on safety and security. When you're hit with an unexpected power outage, you want to know that you and your family are protected.

With a home standby generator, your home will never lose power again. Our generators turn on automatically in the event of any power loss to restore power to your home within seconds.

*Product shown with optional fascia accessory

POWERPACT™

7.5 kW home standby generator

Generac's Powerpact home standby generator is the affordable, automatic alternative to portable backup power. Features incorporate the quality and reliability of the best selling Guardian Series, while remaining the most affordable home standby generator available.

- Runs on LP or natural gas
- Prepackaged system available with a 50 Amp transfer switch featuring an eight circuit load center including breakers
- Generac OHV engine is designed for reliability and long life
- TruePower™ Technology provides clean, smooth operation of sensitive electronics and appliances

GUARDIAN® SERIES

10-26 kW home standby generators

Generac's Guardian Series offers a wide range of solutions, so you can get the level of coverage that is appropriate to your needs. Choose from a pre-packaged system or have your dealer or contractor help design the best system for you.

- Mobile Link Connectivity. Generac's Mobile Link actively monitors your generator status on your smartphone, tablet, anywhere in the world, for free
- 5 Year Limited Warranty for automatic standby generators
- Generac generators and engines are engineered and built in the USA*
**Assembled in the USA using domestic and foreign parts*
- The Generac G-Force Engine is purpose-built, pressure-lubricated engine capable of handling the rigors of generator use, resulting in power that's more reliable and requiring less routine maintenance than any competitive engine
- 24/7/365 Customer Support Team standing by all-day every-day from our headquarters in Wisconsin to answer any questions you might have

ECOGEN

15 kW home standby generator

Generac offers an automatic standby generator engineered specifically for off-grid applications. The EcoGen eliminates the expense and unreliability previously associated with alternative energy backup power options, instead providing affordable, reliable, low emission, off-grid standby power.

- Engineered to easily integrate into the existing inverter and battery storage system
- Runs on environmentally friendly, energy-efficient natural gas or liquid-propane, an alternative fuel that stores easily and indefinitely, and is freely available at many off-grid locations might have

Large Home & Commercial Generators

When more power is required, Generac has what you need.

As the world's #1 manufacturer of home standby systems, Generac identified and responded to the need for affordable, higher kW units for larger residences and businesses. Through innovative engineering, Generac has eliminated the noise, cost, and environmental issues that once made standby power impractical for these applications. When more power is necessary, install a quiet, clean and affordable solution from Generac.

PROTECTOR SERIES - GASEOUS

22-150kW higher power units

The higher power units of Generac's Protector Series are ideal for larger homes and small-to-medium-size businesses such as convenience stores, restaurants and offices.

- Continuous fuel choices in liquid propane (LP) and natural gas offer cleaner-burning fuel solutions than traditional diesel engines
- True Power Technology delivers best-in-class power quality with less than 5% total harmonic distortion for clean, smooth operation of sensitive electronics and appliances
- Quiet-Test Self Test Mode – Runs at a lower engine speed for a five or twelve minute test, is significantly quieter than other brands, and consumes less fuel.
- Mobile Link Connectivity. Generac's Mobile Link actively monitors your generator status on your smartphone, tablet, anywhere in the world, for free

PROTECTOR SERIES - DIESEL

15-50kW diesel generators

Generac's Protector Series diesel units raise the bar for residential and light commercial diesel generators. Building and zoning codes can vary greatly from one region to another. In the past, the only answer was to order expensive, custom-configured solutions. Until now.

To address the variances in code, Generac's diesel-powered Protector Series is the only automatic standby generator to feature Code Ready, a set of common options that are preconfigured to ensure that the generator will be adaptable to a variety of municipal codes. A wide range of code-driven accessories are available to address any further code conformance requirements.

- External vent and fill fuel tank
- UL142/ULC S601-listed
- UL/CUL 2200-listed generator
- Aluminum, weather-resistant enclosures
- Larger fuel tank options available for extended run times

Need a three-phase option up to 150kW?

Ask your dealer about Generac's three-phase commercial generators.

IDEAL INDUSTRIES/APPLICATIONS:

- Convenience Stores & Gas Stations
- Small Outpatient & Dental Clinics
- School Offices & District Buildings
- Banks & Financial Institutions
- Manufacturing Industry & Distribution
- Restaurants & Bars
- Offices with Small Server Rooms
- Larger Homes or Homes with Guest Houses
- Green Houses

Nothing is built like a Generac.

Generators are often required to run for hours, days or even weeks at a time. Continuous use can cause a lot of strain on engines not specifically engineered to withstand extended run times. We have developed robust engine solutions to ensure our generators provide the reliability necessary to power through even the most demanding situations.

5-YEAR LIMITED WARRANTY

Included with all home standby generators.

TRUEPOWER™ TECHNOLOGY

Delivers best-in-class power quality with less than 5% total harmonic distortion for clean, smooth operation of sensitive electronics and appliances.

POWER ZONE® CONTROLLER

The Generac Power Zone (R) Digital Control Platform is fully integrated and multipurpose family of controllers for Generac generator systems.

GENERAC'S G-FORCE ENGINE

Purpose-built for the rigors of power generation. It also requires fewer scheduled maintenance checkups than some competitor's engines, and provides the reliability you need for the long run-times that emergency backup can require.

BUILT IN THE USA

Generac generators and engines are engineered and built in the USA*
*Assembled in the USA using domestic and foreign parts.

24/7/365 CUSTOMER SUPPORT TEAM

Standing by all day, every day from our headquarters in Wisconsin to answer any questions you might have.

PERMANENT POWER

Automatically turns on, providing backup power to your home.

QUIET-TEST™ SELF-TEST MODE

Runs at a lower engine speed for a five or twelve minute test, is significantly quieter than other brands, and consumes less fuel.

GENERAC'S EVOLUTION™ CONTROLLER

Featuring a dual-line, multilingual LCD display allowing for easy monitoring of history and maintenance logs and manage your generator.

NO EXTENSION CORDS

Runs on your existing natural gas or LP supply.

ECONOMICAL POWER

Runs on highly efficient, cleaner-burning* Natural Gas or LP Fuel.
*As compared to other fossil fuels.

Mobile Link™

Generator Connectivity

Monitor the status of your generator from anywhere in the world with **Mobile Link™** Connectivity – now standard on all Generac home standby generators. Mobile Link seamlessly connects to your homes' Wi-Fi system, allowing you to easily receive information, such as current operating status and maintenance alerts, using your smartphone, tablet, or PC.

Save time and headaches.

Our Mobile Link service connects with your Wi-Fi connected generator to provide real-time status updates. No more surprises when you need your generator the most.

Free to start.

Mobile Link Remote Monitoring is FREE with every Generac home standby generator.

Subscription plans designed for you.

Multiple subscription plans available. With all plans, you can download our Mobile Link app and monitor your generator from anywhere in the world.

Get faster service with a Dealer-Managed plan.

Your dealer can provide quicker service or maintenance with front-line access to your generator's information.

More peace-of-mind and confidence.

Added protection and security whether you're home or away.

Improved ownership experience.

Having proactive information about your generator (24/7, 365 days a year) allows you and your dealer* to act quickly when a problem occurs—before or during an outage.

*with a Dealer-Managed subscription

Open your smartphone's camera app and scan the code below, or visit www.mobilelinkgen.com/getstarted

How does it work?

- 1** Your generator experiences a change in status (either running, fault or maintenance alert).
- 2** Mobile Link sends you a real-time notification to your app, email, or text notifying you of the change.
- 3** For the ultimate peace of mind, you can authorize a preferred dealer to service and remotely monitor your generator for you, taking care of any issues or maintenance needs that may arise.

Make sure to ask your dealer about how to connect with Mobile Link. Go to www.generac.com/dealer-locator to find your dealer.

Key Features

Get **real-time notifications** about your generator

View your **maintenance needs**

Remotely access your **generator's health**

Transfer Switches

Because Generac understands the transfer switch is the core of the generator system, we offer more options than any other manufacturer to ensure coverage requirements are met. All switches are ETL listed.

ESSENTIAL CIRCUIT COVERAGE OPTIONS

Some homeowners prefer a simple, economical approach. Essential coverage protects only your most important circuits — such as lights, furnace, water heater, refrigerator/freezer and sump pump.

MANAGED WHOLE HOUSE OPTIONS

Whole-house coverage may not fit every budget. With a power management system, your generator can work smarter. It protects all your home's circuits by cycling power on and off as needed for different appliances. And you decide what gets priority. A Generac power management system protects all the circuits in your home — without the higher cost of whole-house coverage.

Chances are you won't need to turn on every appliance at the same time during an outage. (Most people don't.) Generac power management systems monitor power needs throughout your house — automatically cycling power on and off where it's needed.

The way it works is simple. You decide which circuits are most essential to your home. Whenever the generator approaches its power limit, the system turns off non-essential circuits to prevent an overload. Once essential circuits are satisfied, it cycles non-essential circuits back on.

COMPLETE WHOLE HOUSE OPTIONS

Most homeowners want the peace of mind that comes with whole-house coverage. Whenever there's an outage, you don't have to worry — because the power stays on at all times throughout your entire home. A Generac whole-house power system backs up every electrical circuit in your home whenever the power goes out.

There's no waiting for an appliance to take its turn being powered — everything comes on and stays on. So you don't have to decide which circuits are most important. They'll all be available, automatically, around the clock.

The full line of Generac whole-house power systems includes larger generators and transfer switches capable of covering every circuit in any size home. It's a comprehensive approach for complete peace of mind.

Accessories

Enhance your Generac standby generator's performance with accessories from the leader in standby power. Products are available to maximize convenience and simplify maintenance for years of reliable standby power.

SCHEDULED MAINTENANCE KITS

A scheduled maintenance program ensures the generator system is always in top operating condition and warranty requirements are being met. Generac's scheduled maintenance kits provide all the hardware necessary to perform complete routine maintenance on a Generac automatic standby generator. Maintenance is recommended at every 200 hours or 2 years.

Kit contents may vary by model. Kits Include:

- Air Filter
- Oil Filter
- Spark Plugs
- Oil Funnel
- Chamois
- Reminder Sticker

COLD WEATHER KIT

If the temperature falls below 0° F, install a cold weather kit to maintain optimal battery and engine oil temperature. Kit contains a thermostat-controlled battery pad and engine-block warmer.

EXTENDED WARRANTY

Up to five years extended warranty coverage available through Generac Industrial and Residential/Commercial Dealers, on generators ranging from 10 to 150 kW (7 and 10 year options available).

For more accessories, visit Generac.com
